Easy Clean

ECO SURFACE

THE NEW EASY CLEAN SURFACE TREATMENT MAKES IT REALLY EASY TO CLEAN YOUR SHOWER CABIN. THIS LAYER, WHICH IS ADDED ON THE SURFACE DURING THE MANUFACTURE OF THE GLASS, PREVENTS THE DEPOSITION OF STUBBORN LIME SCALE STAINS AND OTHER CONTAMINANTS.

Clyde 90

SHOWER CABIN

90 × 90 × 200 cm

With its interior design and the large opening door, the Clyde cabin ensures ample space for you while showering.

- polished aluminium frame
- chrome-plated steel handles

- hidden double rollers
- right side and left side design

Premier

FIX SIDEWALL FOR SHOWER WALL WITH SLIDING DOOR

90 × 190 cm

Add a fix sidewall to our Premier model shower door, and you will have a complete shower cabin. By adding two sidewalls, you can break the convention of installing in a corner, and may even place your shower cabin in the middle of a wall.

6 mm thick safety glass

polished aluminium frame

- 6 mm thick safety glass with Easy Clean surface treatment
- polished aluminium frame
- right side and left side design

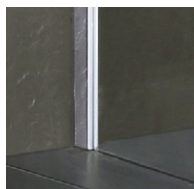

Astro Corner 90/120

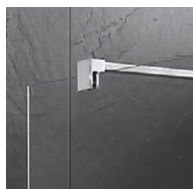

WALK-IN SHOWER WALL

90 × 190 cm, 120 × 190 cm

The fixed wall profile of the partially free-standing Astro Corner shower walls provides extra safety, while still preserving the feeling of freedom provided by the open space.

polished aluminium profile

chrome-plated steel console

- 8 mm thick safety glass with Easy Clean surface treatment
- polished aluminium profile
- chrome-plated steel console

- right side and left side design

Astro 120/140

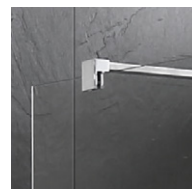

WALK-IN SHOWER WALL

120 × 190 cm, 140 × 190 cm

The free-standing Astro shower wall is unique for its pure simplicity. It combines design and practicality for those who do not like confinement and restrictions.

8 mm thick safety glass

chrome-plated steel console

- 8 mm thick safety glass
- Astro 140 model with Easy Clean surface treatment
- chrome-plated steel consoles
- the supporting consoles can be cut to the appropriate size (length is 117 cm)

We offer a 5-year warranty for our shower walls if installed by authorized service.

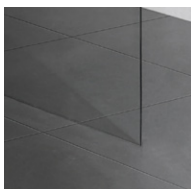

Astro 140 combination

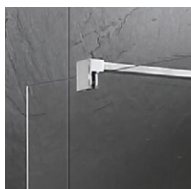

WALK-IN SHOWER WALL

140 × 90 × 190 cm

Our Astro 140 shower wall combination is actually a shower cabin without a door. It mirrors the elegance of the free-standing walk-in shower walls, but if you choose this solution, there will be less worries by splashing water drops.

8 mm thick safety glass

chrome-plated steel console

- 8 mm thick safety glass with Easy Clean surface treatment
- polished aluminium profile
- chrome-plated steel consoles
- right side and left side design
- clear opening: 50 cm

Shower trays

SMC is a soft polyester plate reinforced with special glass fiber, which is polymerized between the appropriate molds at high temperature and pressure. This is how it achieves its final form and the following unique characteristics:

- constant durability and quality
- it is half the weight of cast marble trays, which otherwise have similar features
- the rear-side ribbing reinforces the structure of the tray without adding considerable weight
- extremely impact-resistant

- has high compressive, flexural and tensile strength
- does not crack
- has unique thermal stability (no thermal expansion)
- chemically resistant
- good thermal insulation capacity
- easy to clean

Stiffening ribs

Imber

INTELLIGENT SHOWER COLUMN
WITH THERMOSTAT

38 × 50 × 106 cm

The unique intelligent digital display of the Imber shower column with thermostat keeps track of the current water temperature and how many minutes are left of the preset shower time, throughout the showering process. The faucet body is designed to have space for storing our favourite toiletries, so there is no need to install a separate shower rack.

- shower faucet with thermostat
- chrome-plated steel column
- intelligent, real-time digital display panel
- no-rib shower hose
- wall-mounted hand shower holder
- hand shower
- adjustable height and angle tropical overhead shower
- automatic temperature display
- scald protection
- setting the showering time
- body wash rack

hydromassage tubs

When designing WELLIS hydromassage systems, we focus on offering a wide product range from basic models to the most modern hydro-massage systems. Our goal is to ensure that each customer finds the system that fits their needs best; the system that will offer the comfort needed after an exhausting day.

MASSAGE SYSTEM CONTROL

Hydro™ equipment:

- pneumatic push buttons for control
- hydromassage system

E-Drive™ Touch

- Control with LCD display
- digitally controlled hydromassage and hot tub system
- colour therapy lighting
- tube drying system
- ozone water sanitizer system
- safety lock

E-Max™ Touch

In addition to the E-Drive™ Touch equipment:

- water temperature control system
- FM radio
- exclusive colour therapy lighting: 12-20 pcs LED lights on the side of the tub

HYDROMASSAGE SYSTEM PROPERTIES

Wellis V-Concept™ back massage system

The secret of the Wellis V-Concept™ back massage system – developed by massage therapists and engineers – lies in the size and position of the jets. While in the most widely used system, the water stream, flowing out of 1 or 2 back massage jets, hits the spine directly, the smaller-sized Wellis V-Concept™ jets – due to their positioning – massage the back muscles along the spine, resulting in a faster and more effective massage experience.

Silent™ hot tub motor

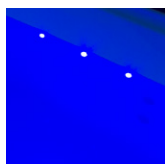

Each bathtub with hot tub system is equipped with a Silent™ motor. In order to provide the best massage experience, we managed to reduce the noise level of the hot tub motor to under 60dB. A further positive characteristic of the product is that it is capable of circulating 200 litres of air per minute.

Wellis Slim™ jet

Its most noticeable characteristic is the aesthetic design of the new Slim™ jets and water inlet, and that they protrude from the tub surface by only 1.5 mm, while the hydromassage jets used by other manufacturers may protrude by as much as 15–20 mm. With this new innovation, we can ensure carefree enjoyment of perfect relaxation. You can rest assured that protruding jets will not cause discomfort.

Thanks to the unique design, tubs equipped with the hydromassage system are outstanding not only in terms of comfort, but design as well.

Exclusive colour therapy lighting

Lighting is built into the sidewall of the tub, directly under the water surface, consisting of 12-20 LEDs that are aligned with the standard underwater colour therapy lighting installed in the tub.

It is standard equipment on E-Max™ Touch and E-Drive™ Touch massage systems.

Tube drying system

The tube drying system – which is available from the E-Drive equipment – offers extra advantage for our hot tubs, since it blows 99% of stagnant water out of the tubes. Thus, there is no need to worry that bacteria and other contaminants — stuck to the tube sides — enter our bodies.

It is turned on about 10 minutes after the hot tub is stopped, and is automatically operated for the same period to dry out the tubes.

It is standard equipment on E-Max™ Touch and E-Drive™ Touch massage systems.

Calabria white

FREESTANDING BATHTUB IN GLOSSY OR MATTE DESIGN

170 × 80 × 58 cm - 270 l

When designing our Calabria product, we followed the principles of simplicity and greatness. That is, when choosing a freestanding tub, the decision is often based on the look, and there are serious doubts regarding usability. In the case of Wellis freestanding bathtubs, comfort plays an important role in designing the models. Due to the corner design of the freestanding Calabria bathtub, it will look very good in a small bathroom, but since its straight side is completely covered, it can be also placed in freestanding position.

- glossy white on the inside
- glossy or matte white on the outside
- double wall, dirt-resistant acrylic bath tub body
- drain and overflow grid + siphon
- hidden levelling feet
- can be pushed against the wall
- gross weight: max. 400 kg

*Faucet is not included in the price.

Calabria black

FREESTANDING BATHTUB IN GLOSSY OR MATTE DESIGN

170 × 80 × 58 cm - 270 l

Our Calabria black model combines an extra modern look with the grace of simplicity. The black acrylic model adds modernity to even traditional bathrooms, so being immediately eye-catching is unavoidable. The Calabria model will look amazing even in a very small bathroom!

- glossy white on the inside
- glossy or matte black on the outside
- double wall, dirt-resistant acrylic bath tub body
- drain and overflow grid + siphon
- hidden levelling feet
- can be pushed against the wall
- gross weight: max. 400 kg

*Faucet is not included in the price.

Sierra

FREESTANDING BATHTUB

170 × 80 × 72 cm - 290 l

Thanks to the romantic design of the Sierra tub, it can easily turn out to be the highlight of your bathroom. Position it anywhere you wish, and enjoy its features right away. Its modern design and sleek forms make this product truly unforgettable.

- double wall, dirt-resistant acrylic bath tub body
- acrylic layer thickness: 4-5 mm
- drain and overflow grid + siphon
- hidden levelling feet
- gross weight: max. 440 kg

*Faucet is not included in the price.

Gloria

FREESTANDING BATHTUB

- double wall, dirt-resistant acrylic bath tub body
- acrylic layer thickness: 4-5 mm
- drain and overflow grid + siphon
- hidden levelling feet
- gross weight: max. 360 kg

*Faucet is not included in the price.

Cast marble freestanding bathtub

Thanks to the unique production technology of cast marble products, creating a diverse design may only be limited by imagination.

Thanks to the right proportion of different minerals, our cast marble bathtubs are highly resistant to mechanical damage. In addition, the extra-hard gel coat for sanitary ware with a thickness of 0.5 mm makes the surface heat-resistant, scratch-resistant and pleasant to the touch.

Soul white

FREESTANDING CAST MARBLE TUB IN MATTE WHITE

167.5 × 85 × 53 cm - 268 l

The ergonomic design of the Soul cast marble tub guarantees a pleasantly soothing bath.

- mineral composite raw material
- antibacterial, heat-resistant matte gel coat for sanitary ware
- surface with extremely high resistance
- drain and overflow grid
- net weight: 150 kg, gross weight: max. 416 kg

*Faucet is not included in the price.

Soul black

FREESTANDING CAST MARBLE TUB IN MATTE BLACK

167.5 × 85 × 53 cm - 268 l

The black version of the Soul tub, which adds extra effect with its elegant shape and matte, silky surface

Porcelain basin

In our range of porcelain basins, counter-top porcelain basin models with elegant slim rim designs are offered, as well as the more practical wall-mounted basins — which also serve well without a basin cabinet in rooms with a small floor area.

For our counter-top porcelain basins, choose a tall faucet from our broadening range, and we also recommend purchase of our click-clack drains — available with or without overflow — with the top in chrome, white or black porcelain in matte or glossy design.

RIMLESS TOILET

rimless design

The most important feature of rimless toilets is that there are no unreachable areas, so they can easily be kept clean. Precisely designed shape – the toilet bowl's special design ensures that water will swirl around on the inside without splashing, and clean the entire inner surface. Unlike standard rim flush toilets, rimless technology toilets have hidden fixtures, so you will no longer have to clean up the dirt settled on the mounting screws, and you won't have to worry about deposits under the rim. The recommended maximum water flush capacity is between 6-7 litres, the average sound load of standard rim flush toilets is 75-80 dB, and the average sound load of rimless toilets is 80-90 dB. We recommend providing the pipes with sound insulation during installation.

QUICK RELEASE

Wellis toilet seats are equipped with the Quick Release easy removal system. In addition to quick installation, this solution also makes cleaning much easier, since the seat can be removed without fiddling with the hinges, at the push of a button – and it can then be replaced just as simply.

2 FLUSH VOLUME

4/6 l

Each of our mono-block toilets are available with a 4-6 liter choice of flushing volumes to help save precious water

SOFT-CLOSE

Toilet seat equipped with soft-closing system. Nowadays, there's a basic requirement that a toilet seat should close softly, without outer intervention. On this issue, we won't compromise either, so each of our toilet seats is equipped with this technology.

SLIM SEAT

Each toilet seat perfectly fits the respective toilet bowl. The Clement collection's extra thin Slim seat provides an elegant look.

HIDDEN HINGES

There is only one tiny attachment point visible on the surface of the sanitary product. In addition to the aesthetic aspects, it also ensures easy and more hygienic cleaning.

Toilet tank

CORSICA / CORSICA BLACK TOILET TANK OUTSIDE THE WALL FOR FLOOR-STANDING AND WALL-MOUNTED TOILETS

48.3 × 10.8 × 100.3 cm

- safety glass front cover in white or black
- polished aluminium frame

"S" TOILET CONNECTOR

FOR FLOOR-STANDING AND MONO-BLOCK TOILETS

- Converter module for floor-standing and mono-block Ditte and Clement toilets (with floor outflow)

Toilet seat

SOFT-CLOSE

toilet seat equipped with soft-closing system, which prevents the noisy slamming of the toilet lid – instead, it closes itself slowly.

QUICK RELEASE

The seat can be easily removed from the toilet, so the surface can be cleaned without difficult dismantling work.

Andreas

TOILET SEAT

- With soft-closing system
- Quick Release fixing
